Pepi

The workforce is the heart of every business. Providing your colleagues with a comfortable and inspiring environment is the key to success.

Pepi has been designed with comfort and convenience in mind. The combination of ergonomic features with easy adjustment make Pepi ideal for the fast paced work environment, meeting the needs and requirements of individual users.

Pepi fully upholstered, balance mechanism, seat slide with black five star base

1. Supportive and stylish with a fully upholstered back
2. Curved back, ergonomically designed for increased comfort
3. 4D height adjustable arm option to suit individual requirements
4. Balance mechanism with self weight adjustment for ease of use
5. Black nylon five star as standard, with a polished chrome option

Stylish and ergonomic

Easy adjustment and meeting individual requirements are paramount when it comes to the Pepi Mesh task chair. Pepi Mesh offers the user full support and ultimate comfort with the new Balance mechanism.

Pepi Mesh also comes with a fully upholstered seat and a choice of colourful mesh backs, making this Pepi Mesh the most eye catching chair in the workplace.

Shown below: Pepi Mesh, black mesh, height adjustable arms, balance mech, seat slide with polished chrome five star base

Remi

Simple in its concept...

We believe that good, quality design should come at the right price for our customers, so let us introduce Remi, the lighter approach to task seating. Not only is Remi light in weight, but this classic design also comes at a very affordable price, keeping your budgets "light" too.

Design features such as the contoured foam seat and back, adjustable arms, mechanism options and a standard high back make Remi the ultimate task chair, suitable for every office and every pocket.

Left and right: Remi Upholstered with height adjustable arms and a black five star base

...Sustainable in its design

The Remi chair has a recycled content of **38.5%,** giving life to material waste. Remi also has a very high recyclable content of **99%**, making this chair extremely suitable for circular furnishing concepts.

The essential mesh task chair

Remi Mesh is a fundamental task chair fitted with a stylish and breathable mesh back. The back is ergonomically shaped, height adjustable and delivers comfort throughout the day. Available in six different colours, Remi brings a contemporary feel to every office environment.

Tally

Where functionality meets style

Adjustment should be easy and functionality should be standard. The contemporary design of the backrest, combined with Tally's ergonomic benefits and quality, make this task chair a popular choice.

Tally's squared design suits all modern office spaces and with the modular selection of features, Tally is easy to adapt to suit the individual whilst still keeping a consistent look and feel through the workplace.

With an inflatable lumbar support and seat slide options, Tally helps the user to sit better, improving posture and productivity. For all of these reasons and many more, Tally is considered as a popular and reliable task chair.

Tally High Back & Tally Medium Back chairs, both with height adjustable arms and a black five star base

1. Tally features a medium and high back, ergonomically shaped and height adjustable. The square design compliments the contemporary office environment.

2. Choose between fixed or height adjustable arms to suit individual requirements and work stations.

3. Moulded seat foam for a comfortable sit. The waterfall front prevents pressure behind the knees and upper legs. All mechanisms are also height adjustable.

4. ISB mechanism: Two levers to adjust the seat height and back angle. An additional third lever can be found on the opposite side to adjust the seat angle.

5. Synchro mechanism with body weight and height tension adjustment to ensure the user has the ultimate suport.

6. Choose between a black nylon, satin or polished aluminium five star base with a choice of castors.

TALLY

Dimensions

Features

- Standard with black nylon base
- Inflatable lumbar support
- Hard tyre castors

Materials

- Arms are always black, the finish options are for base only
- Seat slide cannot be retrofitted

How our mechanisms support the individual

Sit better - work better

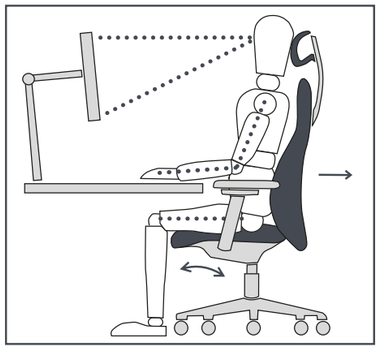

PCB

Permanent Contact Back

A PCB mechanism is the most basic of mechanisms and therefore the most simple to set up. The seat does not adjust, however the back tilts forward and backward independently from the seat.

The back is best left unlocked to encourage movement and for the user to have perminent contact with the backrest. This supports the pelvis and lower back, whilst still keeping the user's feet firmly on the floor.

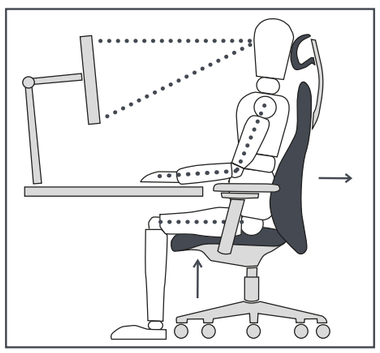

ISB

Independant Seat and Back

An ISB mechanism allows the seat and back to be adjusted separately to suit the individual needs of the user. It is important to adjust the chair to encourage the correct posture as well as the individual's needs in relation to their day-to-day tasks. It is not advised to leave the seat and back unlocked simultaneously.

For example if the user undertakes a lot of reading and writing, a more forward position is required, where the seat and back both need to be tilted slightly forward. However most prefer the seat and back to be tilted more towards the rear of the chair for on-screen tasks.

Sychro

Synchronised Mechanism

Using the free float mode by unlocking the backrest encourages movement and rocks the seat in a 2:1 ratio with the backrest. Adjusting the tension of the mechanism to suit the individual alters the flexibility of movement, supporting the pelvis and lower back whilst keeping feet firmly on the floor.

Balance

Balance Mechanism

Similarly to the Synchro, the Balance mechanism offers a free float mode. The internal mechanism on the Balance automatically adjusts the tension to the individual user's weight so that the seat and back move whilst still supporting the pelvis and lower back.

Nomi

Customisation is key

Choose from three sizes of backs, two seat sizes, three mechanisms, four arms and a wide range of accessories to suit the users ergonomic requirements, workstation and budget. Nomi offers a solution for everyone.

1. Nomi Medium back with fixed ring arms and black base
2. Nomi Extra High back with fold down arms, headrest and black base
3. Nomi Draughtsman chair with a footring, black base and glides

Why Nomi?

Nomi has been designed to adapt to your workplace, offering every user the opportunity to sit comfortably and feel supported throughout the working day.

The simple design of Nomi and the option of fabric, leather or vinyl upholstery, makes Nomi suitable for any interior design scheme.

Nomi Medium back with fixed ring arms and black base
Nomi Extra High back with fold down arms, headrest and black base

Comfort

- A height adjustable, contoured back is available in three sizes for optimal support: medium, high and extra high.
- Optional headrest to support and relax neck and shoulders.
- The moulded foam seat offers increased comfort and is available in two sizes. All seats are height adjustable and come with optional seat depth adjustment.

Support

- Synchro mechanism with body weight/height tension adjustment. Easy to adjust whilst cultivating a healthy and dynamic posture.
- ISB mechanism offers independent seat and back angle adjustment with tension adjustment. Leave the mechanism unlocked to encourage body movement.
- PCB mechanism offers back angle adjustment whilst the seat remains in a fixed position.

Design

- Choose between a black nylon, satin or polished aluminium base for the chairs. For a higher sit, opt for a draughtsman base with foot ring and glides.
- Nomi also offers four arm options: fixed ring arms, height adjustable arms, height adjustable tube arms and height adjustable fold down arms.
- Upholster your Nomi chairs in leather, fabric or vinyl to create your chosen look.

Rheo

The ultimate ergonomic task chair

Wellbeing in the workplace is vital for maximising organisational performance. The Rheo ergonomic chair range has been designed to address the daily physiological problems experienced by office workers.

Rheo High Back with 4D arms and headrest, Rheo Medium Back with two-tone upholstery and polished 4D arms

Customise your Rheo

We are all individual and no two people are the same. With that in mind, how do workplaces cater for everyone's ergonomic needs? Due to Rheo's highly customisable nature, there is an adjustment to suit every individual.

Rheo High Back with Polished 4D arms, headrest and polished aluminium base

Facilitates a dynamic seating position

20 degree backrest tilt angle

13 degree back angle adjustment

5 degree seat tilt

Loaded with standard ergonomic features

Rheo's functionality and abundance of standard features are combined with sleek aesthetics to enable an ergonomic yet stylish solution.

Narrow back option

Adjustable headrest

6 position back height adjustment

Integral coccyx cut out

Air-permeable fabric panel option

Rounded front seat foam

2D, 4D or Multi-dynamic arms

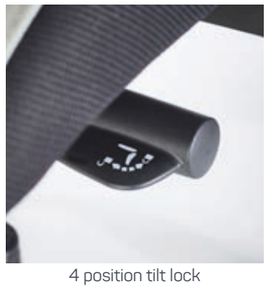

20 degree backrest tilt angle

Weight-activated synchro mech

5 degree seat tilt

158.8kg maximum load

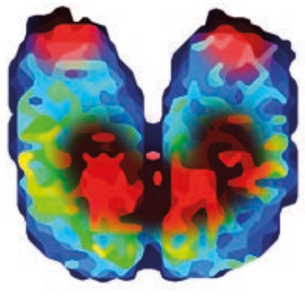

Integral coccyx cut out and contoured seat

The seat is the most important part of any chair. Rheo's specially designed seat ensures an optimal pressure distribution, reducing the pressure load on the seat surface and maximising support for the user.

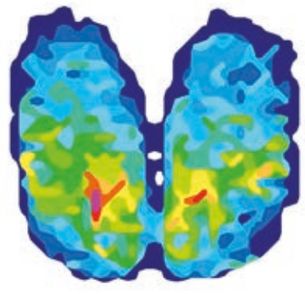

This innovative design decreases the liklihood of developing problems with the circulatory system and causes less or no pain to the tail bone, the sitting bones and soft tissue.

Relieves pressure so you can sit happy

Chipper

Effortless and adaptable

A multipurpose chair that adapts to various environments, Chipper is everything in one: a stackable side chair, a meeting armchair and an upholstered chair. Chipper can also be linked into rows. Different options and accessories make this simple meeting chair a versatile workspace solution.

A Cultural Event

Long rows of fully upholstered chairs create a classy and comfortable solution for a large audience to enjoy any kind of cultural event.

A contoured seat and back pad provide added comfort when seated for an extended period of time. Choose the button detail in a contrasting colour or a textured, quilted fabric to make the chair stand out from the crowd.

Linking accessories are available to link rod frames without arms, creating straight and consistant rows.

Chipper in white with upholstered seat and back pads & button detail

A Meeting or Collaborative Space

Lightweight with a slim profile, Chipper creates an adaptable space for meetings. Sit comfortably on the ergonomically shaped chair with arm rests for increased comfort. Choose one of seven vibrant colours to match your environment.

This page: Chipper with arms

Lectures & Seminars

As seating for an entire auditorium, spacious classroom or smaller teaching groups, Chipper easily adapts to all teaching scenarios, either set up or stacked for storage.

The rod frame is perfectly suited for use in large quantities for lectures or conferences. Simply stack additional chairs on the Chipper dolly for easy storage, ready to be utilised for additional attendees.

Chipper in red with upholstered seat pad

Canteens & Cafes

Take a break in a versatile seating landscape of Chipper chairs and bar stools. Simple to clean and easily reconfigurable, Chipper fits perfectly into a cafeteria environment. The chairs create a comfortable and robust solution for lunch breaks and meetings over a cup of coffee.
