Aesthetically beautiful and **functional**

Rack is a stylish room divider with plenty of storage space. The slight steel tubes create a beautiful frame which can be coloured according to a range of options.

The open nature of the design allows for the separation of different workspaces without closing off the room.

The varying heights of the modular cabinets create an aesthetically pleasing and functional display. With accessories such as cabinet inserts, closed frames and back panels, Rack is incredibly versatile.

Inserts such as cabinets (with or without doors) and planters make Rack extra functional and even more beautiful.
