HOOZONE I

Hoozone | Next Generation

This pod system takes its name from lead product designer Phil Hooton. Hoozone has improved acoustic development (rated at 36dB noise reduction) and updated aesthetic architecture.

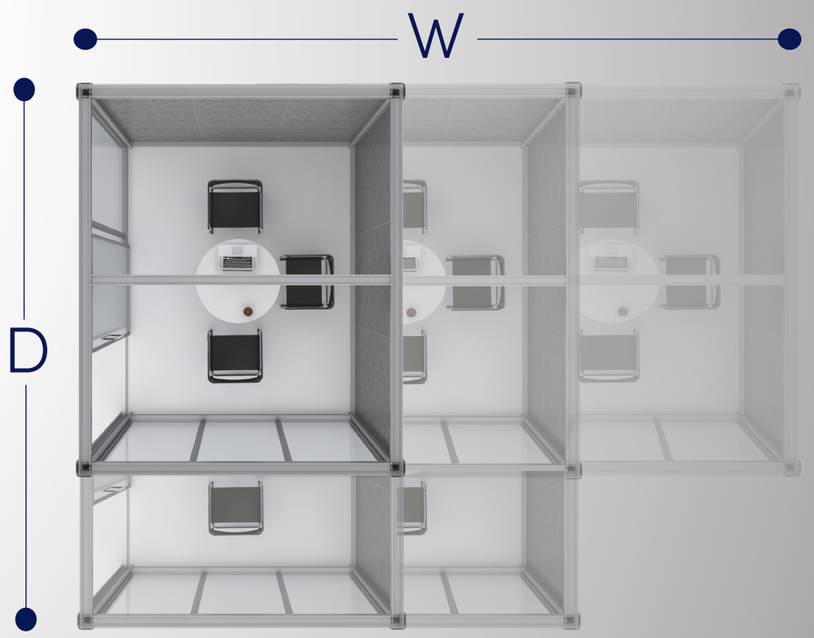

To achieve the improved acoustics it has 22mm double glazed panels, 8mm glazed doors, 55mm sound absorbing upholstered panels and 52mm sound absorbing ceiling tiles. The holistic design includes an integrated facilities arch housing the PIR operated LED strip lighting and air circulation systems, ideal for achieving the client's agile working goals. Alongside the benefit of flexibility, with Hoozone being able to be manufactured to any millimetre increment and with a dedicated new colourful RAL palette to bring softer, calming colours into the workspace, it will be the perfect personalised addition for collaborative spaces.

Rated at 36dB noise reduction

Hoozone | Designed For You...

Hoozone is all about flexibility and therefore isn't restricted to a set size, it can be designed to the exact height, width and depth required down to the mm*.

...Down to the Millimetre

*Max height 2200mm.

Multiple framework finishes
