

ZEN

Escape with Zen

Zen is a philosophy used by monks which allows them to meditate and use their intuition. This ideology translates perfectly into our latest range of upholstered, sound absorbing booths.

Zen provides a quiet space to work or collaborate and can be tailored to your exact requirements, leaving no limitation to the product, only your imagination. The system is remarkably flexible and you can specify the standard 22 models you see here or design-your-own Zen to fit into your space, to suit your needs. Whether you want a breakout space for staff, a calming place for concentration or simply an area to communicate, Zen has a solution. This can be achieved by adjusting the height, width, depth, footprint, configuration, tiers, seating, work surfaces and audio visual/power/charge requirements.

Zen panels are filled with sound absorbing foam, designed to absorb unwanted noise which have been tested with a 30dB rating.

Straight Zen Pods

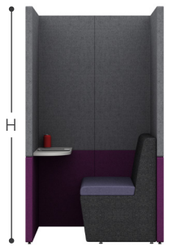

SOLO
